Selling on eBay has benefited tremendously from advanced seller tools like eBay Seller's Assistant Pro, the premier product in the eBay suite of seller tools. With a proven track record, and long history of providing the functionality needed by sellers, Seller's Assistant Pro will help high volume and small business sellers sell more in less time.

eBay Seller's Assistant Pro is a powerful tool that can help you list items and manage your transactions throughout the entire eBay sales cycle.

Before listing items with Seller's Assistant Pro, you first enter them into inventory. Once your items are in inventory, you can easily create and submit listings for any item at any time in the future, over and over again. You can even combine items into groups to submit batches of items at a time.

Designing attractive listings is easy with eBay Seller's Assistant Pro. You can take advantage of HTML templates and/or the built-in template editor to create compelling and professional item descriptions. You can preview your listing to make sure the HTML looks as good as you thought it would.

eBay Seller's Assistant Pro allows you to schedule your listings for when (date and time) you want them to start, up to 3 weeks in the future. When your item is uploaded to eBay, it will be held in an inactive "pending" state until the start time arrives, at which time the listing will be "activated". Listing scheduling can be used for your convenience, or to ensure that your items will begin and end exactly when you want them to. For example, if you are going on vacation, you can schedule some listings to start while you are gone. The feature could also be useful if you prefer to work during the day but want your listings to start and end in the evening. It's a great way to list smarter and more efficiently.

After your listings have been started, you can easily track the progress of your listings with both audible and visual cues to let you know when an item receives a higher bid. Revisions and additions to your item description on eBay can be made easily by simply changing your description in SA Pro and clicking the Revise button.

Once your listing is completed, a sales record and buyer record will be created automatically. You can use the sales record to manage all your post sale processes including sending emails in bulk, or leaving feedback in bulk. Imagine notifying hundreds of buyers that you have shipped their item(s) with a few button clicks.

List more in less time. Maintain better sales records. Expand your business on eBay. Make more money and have more fun doing it. eBay Seller's Assistant Pro will help you take your business to the next level, and it's available now for download on eBay.com.

Specification Sheet for eBay Seller's Assistant Pro

More cool things you can do with eBay Seller's Assistant Pro

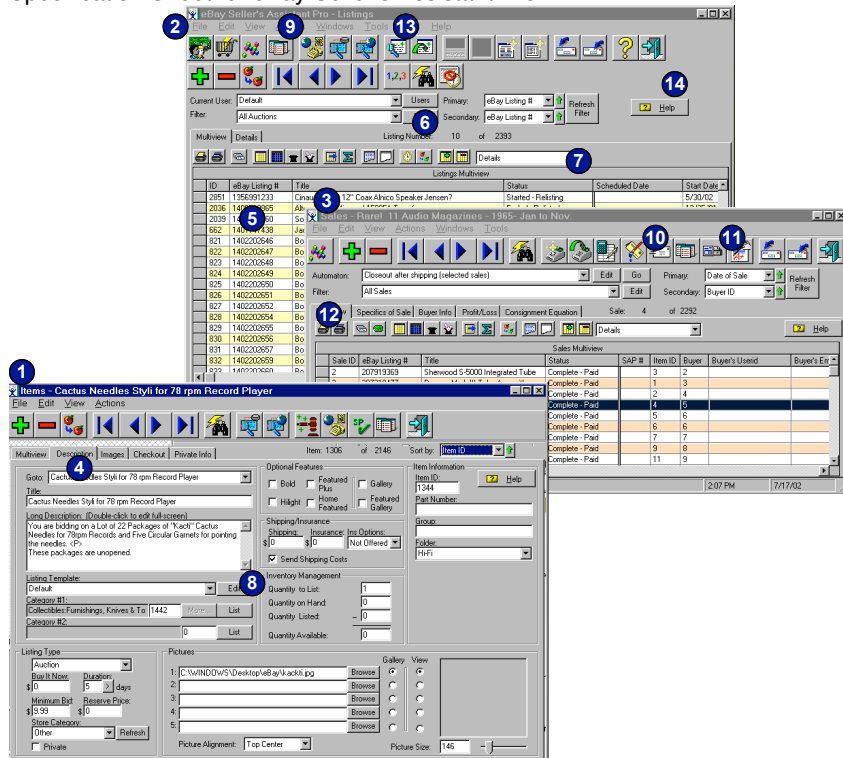

- Manage your inventory quantities so you don't accidentally sell more than you have
